1 Overview

On the first page include the following information:

Producer name: IKEA Industry Poland sp. z.o.o. Oddział Wielbark
Producer location: ul. Czarnieckiego 17a, 12-160 Wielbark, Poland
Geographic position: Lat E 20 degrees 57 minutes, Long N 53 degrees 24 minutes
Primary contact: Tomasz Karczewski (SBP Manager)
Tel: +48 693 720 115
E-mail: tomasz.karczewski@ikea.com
Company website: www.ikea.com
Date report finalised: 14/07/2015
Close of last CB audit: 30/08/2017
Name of CB: NEPCon
Translations from English: Yes, in English and Polish
SBP Standard(s) used: Standard 2, 4, 5 (Version 1.2 published 23 June 2016)
Weblink to Standard(s) used: <http://www.sustainablebiomasspartnership.org/documents>
SBP Endorsed Regional Risk Assessment: Not applicable
Weblink to SBR on Company website: <http://www.inter.ikea.com/en/inter-ikea-group/ikea-industry-polish/>

2 Description of the Supply Base

2.1 General description

In general, the sawmill procurements can be categorised as follows:

- Polish State Forests FSC certified sternwood (FSC 100%) is procured for furniture production.
- Industrial wood residues are used for pellet production, the sawmill is integrated with the pellet production facility (same location).
- Only Scots pine is used (*Pinus sylvestris*, L.)

Polish State Forest

There is a constant increase of the forest area in Poland. According to 2013 data from the Central Statistical Office, forest area covers app. 9.3 million hectares, which is 29.4% of the country's territory. Forestry and the related industrial branches are important elements of the national economy. The State Forest Service gives employment to many people. It is the main supplier of wood processing plants. It cooperates closely with local communities and non-governmental organizations. In recent years, Polish State Forestry has achieved excellent economic results, because of the relatively good price for wood on the international market.

Buying timber from the Polish State Forests, our company is sure that the raw material is being procured in a legal manner, not prejudicial nature.

Forest planning and forest operations in Poland

For foresters and most other stakeholders in Poland the non-production forest functions have become the most important. The Polish State Forest implements sustainable forest management. Foresters acquire wood within the limits set by 10-year forest management plans, approved by the Minister of the Environment.

The Polish timber resources have grown from year to year and doubled in half a century. Wood stocks in the forests managed by the State Forests continue to grow. In 1991, it was 190 cubic meters/ha.; 20 years later, in 2011 – 254 cubic meters/ha. According to international statistics, Polish forests belong in this respect to European leaders. Not only considering wood stock, but also the forest area increase. In the mid-twentieth century, they occupied slightly over one-fifth of Poland; nowadays nearly than one-third.

In terms of spatial structure by species, coniferous species dominate in Polish forests, occupying 72.8% of the total forest area. Among coniferous species, pine covers the largest area.

2.2 Actions taken to promote certification amongst feedstock supplier

IKEA actively promotes the use of renewable energy, responsible stewardship of forests, and a fairer society. For these reasons, IKEA Wielbark is promoting FSC certification; we pro-actively inform stakeholders on FSC and SBP certification.

We inform our suppliers on the content and importance of FSC criteria and indicators. Our business partners need to have a good business policy in place. Our guiding principles when working with environmental, social and working conditions are:

- ✓ What is in the best interest of the next generation?
- ✓ What is in the best interest of our employees?
- ✓ What is in the best interest of the environment?

The IKEA Way on Purchasing Products, Materials and Services (IWAY) is the IKEA Group Supplier Code of Conduct. It comprises of the IKEA requirements relating to the Environment and to the Social & Working Conditions. The values of trust, integrity and honesty are at the foundation of IWAY and are key to the implementation of sustainable development.

It is on this basis that we source business partners. Through continued respect of these values, our company grows. IKEA suppliers always comply with the most demanding requirements, whether they are relevant applicable laws, or IKEA IWAY specific requirements. Considering Sustainable Forest Management, FSC certification is the logical choice.

2.3 Final harvest sampling programme

IKEA Wielbark does not harvest forest stands with the goal to produce pellets. We only use wood residues, originating from woodworking processes.

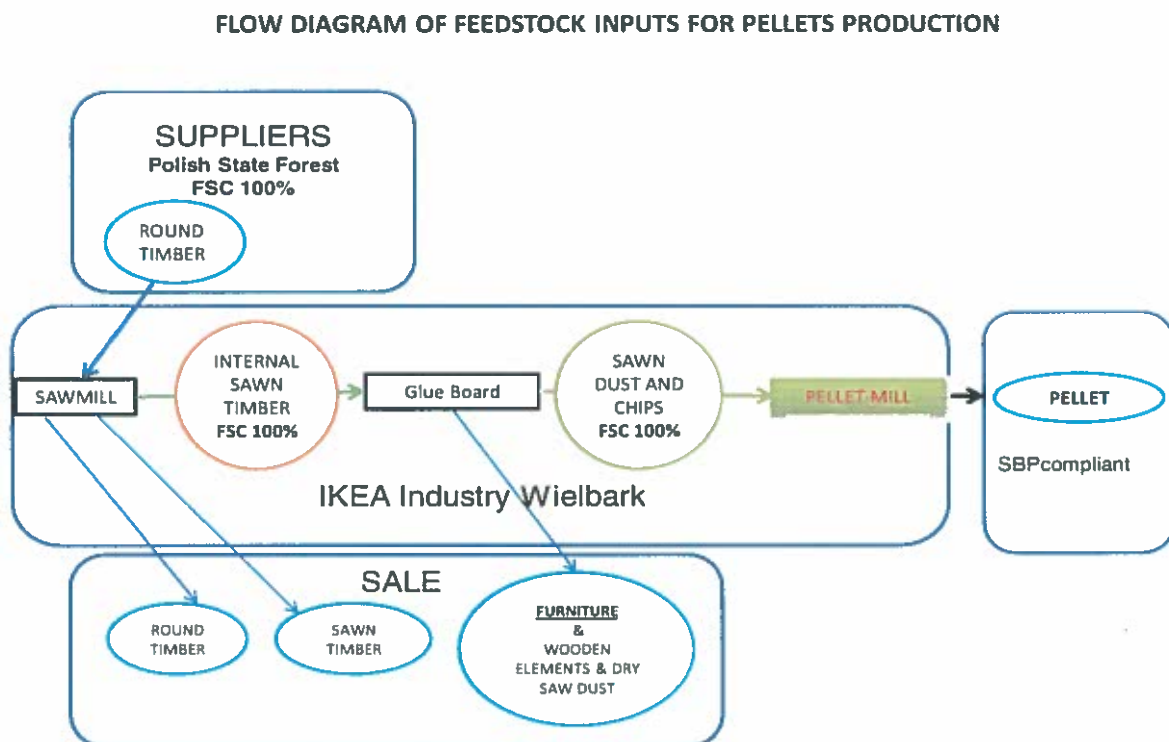

The primary feedstock originates from well-managed multifunctional forests with a long rotation period. The resources are FSC certified and take into account the ecological, economic and social importance of forestry. The following resources are not included in the feedstock:

- Wood from primary forests;
- Stump wood.
- Genetically modified tree species;
- Wood from unclear origin.

2.4 Flow diagram of feedstock inputs showing feedstock type [optional]

Scheme 1: The flow of feedstock for producing wood pellets (SBP-compliant biomass)

The wood pellets of IKEA Wielbark hold the claims:

- SBP-compliant biomass;
- FSC MIX;
- ENplus A1.

2.5 Quantification of the Supply Base

Supply Base

- a. Total Supply Base area (ha): 6.306.239 ha. State Polish Forests that are FSC certified (claim FSC 100%), and from which timber may be harvested.
- b. Tenure by type (ha): 100% public ownership (State Polish Forest Service).
The total Supply Base: 6.306.239 ha.
- c. Forest by type (ha): Temperate forests.
The total Supply Base: 6.306.239 ha.
- d. Forest by management type (ha): Managed Natural forests.
The total Supply Base: 6.306.239 ha
- e. Certified forest by scheme (ha): 6.306.239 ha. FSC certified (100%)

Feedstock

- f. Total volume of feedstock: 32.499 tons feedstock
 - EC category: Wood Industry Residues
 - UK category: Sawdust (100%) (8% moisture content)
- g. Volume of primary feedstock: Our company produces wood pellets from tertiary wood working residues. The wood residues are 100% FSC material.

These residues result from furniture production for which round wood is procured (FSC 100%). The category of this product is:
 - EC category: Stemwood.
 - UK category: Long rotation forestry (conifer)
- h. List percentage of primary feedstock (g), by the following categories.
 - Large forest holdings certified to an SBP-approved Forest Management Schemes (FSC)
- i. List all species in primary feedstock: Scots Pine (*Pinus sylvestris*, L.)
- j. Volume of primary feedstock from primary forest: 0 m³. No primary feedstock from primary forests.
- k. List percentage of primary feedstock from primary forest (i): Not relevant.
- l. Volume of secondary feedstock: 0 m³. Not applicable.
- m. Volume of tertiary feedstock: 100%, 32.499 tons feedstock (8% moisture content)

3 Requirement for a Supply Base Evaluation

SBE completed	SBE not completed
<input type="checkbox"/>	X

Provide a concise summary of why a SBE was determined to be required or not required:

Not required because all feedstock from FSC certified forests.

4 Supply Base Evaluation

4.1 Scope

n.a.

4.2 Justification

n.a.

4.3 Results of Risk Assessment

n.a.

4.4 Results of Supplier Verification Programme

n.a.

4.5 Conclusion

11 Review of Report

11.1 Peer review

Peer review performed by:

- Association of Friends of the Ramucka Wilderness,
- Przemysław Rojek, The Regional Directorate of State Forest in Olsztyn
- Biomass Consult. Their comments can be found in document: D3 Supply Base Report IW 20150724. These comments have been taken into account.

Additionally we ask Greenpeace Poland but so far no answer.

11.2 Public or additional reviews

If another type of external review was done prior to finalisation of this report (e.g. publication for comments by stakeholders, NGOs, or other independent third parties), describe the process here.

12 Approval of Report

Approval of Supply Base Report by senior management			
Report Prepared by:	<i>Tomasz Karczewski</i>	<i>IPS and Quality Manager</i>	<i>13.09.2017</i>
	Name	Title	Date
<p>The undersigned persons confirm that I/we are members of the organisation's senior management and do hereby affirm that the contents of this evaluation report were duly acknowledged by senior management as being accurate prior to approval and finalisation of the report.</p>

13 Updates

n.a.

13.1 Significant changes in the Supply Base

n.a.

13.2 Effectiveness of previous mitigation measures

n.a.

13.3 New risk ratings and mitigation measures

n.a.

13.4 Actual values of feedstock over the previous 12 months

Supply Base

- a. Total Supply Base area (ha): 6.306.239 ha. State Polish Forests that are FSC certified (claim FSC 100%), and from which timber may be harvested.
- b. Tenure by type (ha): 100% public ownership (State Polish Forest Service).
The total Supply Base: 6.306.239 ha.
- c. Forest by type (ha): Temperate forests.
The total Supply Base: 6.306.239 ha.
- d. Forest by management type (ha): Managed Natural forests.
The total Supply Base: 6.306.239 ha

Certified forest by scheme (ha): 6.306.239 ha. FSC certified (100%)

Feedstock

- e. 36.625,1 tons feedstock (01.09.2016 – 31.08.2017)
 - EC category: Wood Industry Residues
 - UK category: Sawdust (100%) (8% moisture content)
- f. Volume of primary feedstock: Our company produces wood pellets from tertiary wood working residues. The wood residues are 100% FSC material.

These residues result from furniture production for which round wood is procured (FSC 100%). The category of this product is:
 - EC category: Stemwood.
 - UK category: Long rotation forestry (conifer)

IKEA Industry Wielbark

- g. List percentage of primary feedstock (g), by the following categories.
 - a. Large forest holdings certified to an SBP-approved Forest Management Schemes (FSC)
- h. List all species in primary feedstock: Scots Pine (*Pinus sylvestris*, L.)
- i. Volume of primary feedstock from primary forest: 0 m³. No primary feedstock from primary forests.
- j. List percentage of primary feedstock from primary forest (i): Not relevant.
- k. Volume of secondary feedstock: 0 m³. Not applicable.
- l. Volume of tertiary feedstock: 36.625,1 tons feedstock (8% moisture content)

13.5 Projected values of feedstock over the next 12 months

72.000 m³ – 36.000 tons feedstock (data from the budget for the Financial Year 2018)
